Adv 연령별 인터넷 이용 차이

How does the Internet usage vary among people of different age groups?
Why do they use the Internet? What do they do online?

Magic template

☆ 1. 일상에서 사용하는 기술

I use technology all the time. When I wake up, the first thing I do is checking my cell phone. I use my tablet to take notes at work, and I use my laptop to watch TV shows in the evening. The main way I communicate with my friends is through my phone. I send and receive messages on my phone all the time. There are a lot of applications you can download for free. So, you can send unlimited text messages and pictures whenever you want. At work, modern technology allows me to look up information online. Without this technology, my projects would take much longer to complete. I'm glad I don't have to go to the library and spend the whole day any more. I am not sure how anyone can survive without technology. So, that's why I use technology all the time.

2. 인터넷에서 하는 활동

I spend most of the day on the Internet. I send messages to my friends and family. I browse social media sites, and I research products I want to buy. Because I have my cell phone on me all the time, I can do all these things even on the move.

The websites I use (or FB) let me keep in touch with my friends, watch funny clips, and even find out about new products. In my case, whenever I go somewhere, I always take pictures and post them on my Instagram.

I can even take selfies and post them up on the spot. My friends usually leave short comments right away. People these days do everything online. Well, that's it.

As I mentioned earlier, I am not sure how anyone can survive without the Internet.

3. 기억에 남은 인터넷 경험/구매 실패 경험/쇼핑 경험

I have been so busy these days, so I had no time to go shopping. Instead, I decided to shop online. (Because of the spread of COVID-19 or pandemic, I don't like to walk around while putting my mask on.) I remember when I shopped online a month ago. I was going to travel to Japan to visit my friend.

I wanted to buy something for the trip. I bought a pair of jeans, a blue sweater, and even a hat. The shipping was fast. However, everything I got was little different from what I expected. I was very disappointed. There was nothing I could do. So, I called the customer service and got helped.

The thing was the line was busy the whole time, and it took me a long time to get connected.

Fortunately, I could talk to the customer representative (rep.) and decided to get an exchange/get a refund/keep the items. I felt like I got ripped-off. It was not worth the money.

Since then, I try to be more careful when I buy something online. (It was definitely one of the most memorable incidents I have ever had while shopping.)
