Transportation : 교통

Int 우리나라의 교통

How do people in your country get around? What kind of transportation do people take? Do people drive, or do they use other means of transportation such as the train or bus?

Tell me everything about how people get around.

Adv 대중교통의 변화

Now, **tell me how transportation has changed over the years.** How is the way people get around different now compared to the past?

Adv 교통관련 경험

Tell me about a time when you had trouble due to a certain mode of transportation.

Perhaps your car broke down or you got stuck in a traffic jam. What happened and how did you deal with the situation? Give me all the details.

1. 우리나라의 교통

Most people use different types of transportation depending on what they need. People either use the buses or the subways to get where they need to go. The subway and bus system in Seoul is very well-organized. Things have become so much better than the past.

When it comes to the subway system in Korea, there are many subway lines. You can get to anywhere easily. You can even get to the rural area. Also, the bus system has become so much better. There are bus-only-lanes. You don't need to be stuck in traffic. In my case, I usually take the bus to get to work on time.

Overall, most people use different types of transportation depending on what they need.

2. 대중교통의 변화

The transportation system in Korea has become so much better than the past. Since there are many new subway lines and bus routes, using public transportation is much easier than driving. In the past, a lot of young people would get a driver's license as soon as they turned 20, but nowadays, many young people don't even learn how to drive. Because using public transportation is much more convenient, people usually take them. People don't find necessity to drive their own cars. Now, it is possible to get almost everywhere in Korea. As I mentioned earlier, public transportation in Korea is well-organized, so people can easily get on it.

Once again, public transportation has become so much better than the past.

3. 교통관련 경험

I don't remember a particular experience I had on the bus or the subway. I never had any problems while taking them. The only thing I remember is when I met a drunken guy on the subway. That's probably the only thing I can think of at the moment. I once took the subway after work. It was full of people. One guy got on the subway and started to talk to himself very loudly. It was easy to tell that he was pretty drunk, I mean, wasted. A few people tried to talk to him and make him get off. However, he kept talking loudly and started to talk to the passengers. I didn't think he would leave any time soon. Eventually, I decided to get off at the next station. I don't know how he got so drunk during the daytime. However, people should be polite in public. Well, that's it. This is the only thing I can think of at the moment.
