1. 집에 있는 가구, 좋아하는 가구

There are many pieces of furniture in my house. One of my favorite pieces of furniture is definitely my bed because I can do so much there. I usually watch TV, read books, and I can even eat while getting ready for work. My favorite thing to do is probably lying on my bed and being lazy because it's so comfy and cozy. Also, I like having some privacy. After a long day at work, I often enjoy being alone, and my bed is definitely the perfect place for that. So, that's why I think my bed is my favorite furniture in my room.

2. 어렸을 때와 현재의 가구 비교

I have lived in the same house since I was young, but the furniture in my room has changed a lot. When I was young, most of the furniture in my room was a lot smaller than now. For example, my bed had a low frame since I often fell off my bed during the night. Once, I sprained my wrist from falling off the bed and had to wear a cast for weeks.

But now, there is a bunch of furniture in my current room and they are a lot bigger too. I have a table, a chair, and of course, my comfy bed. I even have an air-conditioner (the A.C) in my room now. So, it helps me cool off anytime I want. Overall, these are the main differences between my old furniture and my current furniture.

3. 가구에 문제가 생겼던 경험

I remember when my family moved into our new apartment in Seoul. We called up a moving company and they moved everything for us. However, after they left, I found out that one of the dressers was broken. Plus, there were scratches all over my desk. I was quite disappointed. Eventually, I had to repair it myself. I repaired the damage and painted the scratches with bright colors. Afterwards, it looked brand new and I was very satisfied with what I'd done. Ever since that incident, I don't trust moving companies anymore.

Well, that's it. That's probably the only incident that has happened to my furniture.
